

International Chemical Regulation REACH Workshop, 2011

Hangzhou, China, 2011

2011.11.29-2011.11.30

REACH24H Consulting Group, China organized the highly successful International Chemical Regulation REACH Workshop (REACH Workshop) in 2009. This workshop brought together the most senior REACH experts from government, worldwide chemical industrial organizations and global chemical companies to share their expert knowledge in the chemical sector. In 2011, we have invited specialists from the European Chemicals Agency (ECHA), and the Chemical Registration Center, Ministry of Environmental Protection (CRC-MEP) to address recent regulatory changes in both Asia and Europe. Also in attendance will be specialists from the European Chemical Industry Council (CEFIC), U.S. Environmental Protection Agency (EPA), National Registration Center for Chemicals in China (NRCC), Japanese Overseas Environmental Cooperation Center (OECC), Centre Testing International Corporation (CTI) and representatives from top global chemical companies.

At this event, you will have many opportunities to communicate with attendees during the breakout sessions, interactive roundtable discussions, each networking break, and of course the cocktail reception!
